---

# Problem: Teamwork suffers

- Teams are great, the individual experts shine – yet team output suffers. What is going on?
  - Are they seeing **task drop off effects**?
  - How about **workflow and flow zone interruptions**?
  - Are there **Time Bandits** going around?
  - Are **status meetings** creating value or **stealing time**?
  - Is **managerial attention** focused where it should be?
-

---

# Problem: Tasks are dropped

- Task drop-off is a communications issue, a memory issue and it **stops progress** until addressed.
  - Interruptions lead to **lost intention**
  - **Interrupted** tasks lead to a **drop-off** state.
  - Workflow interruptions take up to **25 minutes to recover from**.
  - Interruptions can **cost 6 hours a day – of zero output!**
-

---

# Problem: Time is wasted

- A **Time Bandit** interrupts and then wastes time – 40-60% of **time is wasted** (help requests, off topic queries, etc.)
  - Status meetings **waste time** for the most productive experts in a team.
  - **93%** of workers say they are “**often interrupted**” at work
-

---

# Protect workflows – How?

- Status meetings have a fixed schedule  
= **interruption**

*What if every team member had the option to discuss their tasks when it suits their workflow?*

---

---

# Eliminate interruptions – How?

- Side questions and requests for help during workflow?  
= interruption

*What if team members had the option to **ask for help without disturbing their colleagues?***

---

---

# Prevent drop-offs - How?

- Urgent request, workflow redirected, trace lost  
= **task drop-off**
- Task handover incomplete, differing priorities, reminders not in place  
= **task drop-off**

*What if team members could be **reminded of their tasks how and when it suits them?***

---

---

# Reduce lost time – How?

- Status meetings are Time Bandits for experts and managers  
= lost time

*What if experts could **check status topics** and requests for their help in a call **when it suits them**?*

*What if managers could know who in their team **needs human help first**?*

---

---

---

Introducing...

**Robotti**

Robot **team interface**

(+ Finnish *robotti* = English *robot*)

---

---

# Robotti to the rescue!

Robotti ...

- **never disturbs workflows**
  - **talks to team members when it suits them**
  - **reminds everyone** about their tasks
  - **connects people when they need help**
  - **never** pretends to be human
-

---

# Abilities

## Robotti...

- can **call you** on Teams, POTS, Zoom etc, and **you can call** Robotti
  - can **converse about tasks**
  - can **adapt to your accent** and **communication style**
  - knows about your systems (APIs)
  - can **find help for you** from team members
  - can let you know **who needs your help**
-

# What does Gartner say about automation?

☰ Gartner

STAMFORD, Conn., March 20, 2019

**Gartner Says 80 Percent of Today's Project Management Tasks Will Be Eliminated by 2030 as Artificial Intelligence Takes Over**

**Gartner Predicts 69% of Routine Work Currently Done by Managers will Be Fully Automated by 2024**

---

# Unbundle task management from team leadership

- **Free up valuable time** to concentrate on problem solving, mentoring and generally getting things done.
  - **Structure superior teams**, as the tedious work of task management is offloaded to **Robotti**.
  - Your team has a **daily short call** with **Robotti** in addition to your possible daily standup meeting.
-

---

# Interested in trying Robotti?

- Ainolabs is looking for **active pilots** for early 2021.
  - Would you like to try Robotti in action?
  - Would you like to be part of **Conversation Designs** for Robotti?
    - (Robotti is in early development.)
  - Please contact Aarne at [info@ainolabs.com](mailto:info@ainolabs.com) or + 358 40 844 3355
  - We're looking forward to hearing from you!
